Breaking News (NJ) <http://www.njusao.org/break.html>

NEWARK – A Princeton scientist was sentenced today to 12 months of home confinement and five years of probation for defrauding the United States in connection with research grants he applied for and received for his company as well as for tax evasion, U.S. Attorney Christopher J. Christie announced.

Also today, Moshe Lavid, 63, agreed to pay a total of \$1.4 million to the government for the tax evasion and to settle allegations that he made false certifications to the National Aeronautics and Space Administration (NASA), U.S. Department of the Air Force, National Science Foundation, Department of Energy and Department of Agriculture to obtain federal research grants under the Small Business Innovative Research Program (SBIR).

Lavid, a Ph.D., is the owner of M.L. Energia, Inc., a Plainsboro-based company involved in scientific research. The company formerly contracted with the federal government to conduct research focusing on the interaction between photons generated by lasers or advanced light sources and matters, mostly gas and liquid.

During his guilty plea to mail fraud in the criminal case on June 18, 2004, before U.S. District Judge Harold A. Ackerman, Lavid admitted failing to notify the National Science Foundation that he had inappropriately used old data that had been produced under an earlier contract with the Air Force.

The criminal Information to which he pleaded guilty describes a broader scheme in which Lavid received grants and contracts from various U.S. Government agencies and the military, pursuant to the Small Business Innovation Development Act. For instance, as described in the Information, in order to be eligible for the grants and contracts under the SBIR program, the research in question had to be performed primarily by the recipient. Lavid occasionally subcontracted out major portions of the grants and contracts, violating their terms, according to the Information.

Furthermore, according to the Information, Lavid, on behalf of Energia, occasionally applied for funding from one federal agency for a proposal for which he had already received funding from another federal agency.

Lavid also pleaded guilty to one count of tax evasion, which charged him with evading more than \$93,000 in income tax on his personal tax return for 1998. Lavid agreed to pay the government \$288,414.04, which included penalties and interest.

Judge Ackerman today sentenced Lavid on the criminal charges to 12 months of home confinement with electronic monitoring and five years of probation. Lavid is barred from working as or for government contractors for the length of his period of probation. He was also fined \$20,000.

The settlement of the civil complaint resolves allegations filed in 2000 against Lavid and his small research and development company. The complaint alleged violations of the False Claims

Act, which permits recovery of triple the amount of the damages to the government plus penalties, according to Assistant U.S. Attorney Stuart A. Minkowitz, of the Civil Division of the U.S. Attorney's Office.

As part of the settlement, Lavid will pay \$1,111,585.96 to the government, no later than November 10, 2005. The settlement was signed and unsealed today by U.S. District Judge Dennis M. Cavanaugh.

The lawsuit was originally filed under seal in accordance with the whistle blower provisions of the federal False Claims Act by Moisey Teytelboym, an employee of M.L. Energia, Inc. The whistle blower provisions permit private citizens to bring lawsuits on behalf of the United States and share in any recovery obtained by the government.

Under the False Claims Act, Teytelboym will receive a 22-percent share of the settlement, or \$244,548.91.

Lavid substantially denied the allegations contained in the civil lawsuit, with the exception of those he admitted to in his guilty plea.

Christie credited Special Agents and investigators assigned to the NASA Office of Inspector General, under the direction of Special Agent-in-Charge Michael Sonntag; the Defense Criminal Investigative Service, under the direction of Resident Agent-in-Charge James Murawski; the IRS Criminal Investigation Division, under the direction of Special Agent-in-Charge Patricia J. Haynes; the National Science Foundation Office of Inspector General, under the direction of Special Agent-in-Charge Matthew Quinn; the U.S. Department of Energy Office of Inspector General; under the direction of Special Agent-in-Charge Yvette Milam; and the U.S. Department of Agriculture Office of Inspector General, under the direction of Special Agent-in-Charge Brian L. Haaser, with investigating the case.

In the criminal case, the government was represented by Assistant U.S. Attorney Donna Gallucio; the civil complaint was handled by Assistant U.S. Attorney Stuart A. Minkowitz.

-end-

Counsel:

for Moshe Lavid and M.L. Energia, Inc.: Justin P. Walder, Esq., Roseland, NJ

for Moisey Teytelboym: Timothy J. McInnis, Esq. New York, NY
